

ReportZone is the simplest and most convenient way to obtain Athena's analysis reports. With this service, you don't have to worry about licensing any software, Athena does all the work for you. If you have responsibility for ensuring how firewalls comply with network design goals, security policies, best practices or PCI requirements, ReportZone gets you fast results with no training or ramp up time.

**1****Upload****2****Manage****3****Retrieve**

Securely upload your configuration files. ReportZone models the behavior of the firewall without any active testing or communication to the device.

View pending and completed jobs, status updates and work order history

Receive email updates when your reports are ready. The email alert includes instructions on the secure location where results can be retrieved.

ReportZone allows managed security service providers, security consultants, PCI auditors and security managers to stay focused on interpreting analysis results and on providing superior recommendations that are truly atypical. Your subject matter expertise will always shine through when you have ReportZone helping you!

## Available Services

### Firewall Assessment

- Identify the security exposures in the firewall. Audit the rulebase for duplicated and conflicting rules

Powered by:

Comprehensive analysis on Cisco PIX/ASA, Checkpoint and Juniper Netscreen firewalls

### Firewall PCI Audit

- Determine all inbound/outbound services to/from the PCI Zone for any interface attached to the firewall

Powered by:

One convenient report that includes the control items and customized policy calculations

### Network Segmentation

- Verify systems processing cardholder data are well segmented from the rest of the network

Powered by:

For up to 5 or 10 devices. This report shows network compliance to PCI requirements

**ReportZone delivers directly to you. Its fast, reliable and safe.**

## **Access**

- Password authentication required
- Separate logins per user per account

## **Data Transmission**

- All communication uses SSL

## **Data Storage**

- Data is stored in an encrypted format
- All data is deleted upon delivery

## **Data Handling**

- Only handled by Athena certified employees
- No third party outsourcing

## Using Athena ReportZone

Getting started on ReportZone takes minutes. Athena's SLA ensures timely delivery and incident response.

	<b>Firewall Assessment</b>	<b>Firewall PCI Assessment</b>	<b>Network Segmentation</b>
1 <sup>st</sup> time	Flat fee per firewall	Flat fee per firewall	Flat fee per firewall plus incremental fee per router
Repeat assessment	50% of 1st time fee Includes bonus policy comparison report	50% of 1 <sup>st</sup> time fee Includes bonus policy comparison report	50% of 1 <sup>st</sup> time fee Includes network change comparison report
