

PCI Zone Firewall Policy Detail for acmecorp-pix

Completed on Thu Jul 15 11:27:48 CDT 2010

This report provides a detailed list of all policies to and from networks in the PCI Zone to networks in other zones including external networks. For even greater detail such as the acl, nat, and routing rules that allow a service, generate a report using the FirePAC query mechanism with the rule trails option selected.

Networks in the PCI Zone

The following networks are reachable from each network interface in the PCI Zone.

PCI Interface	Reachable Networks
testweb (192.168.50.1/255.255.255.0)	192.168.50.0/24

Policies from the PCI Zone

This section lists source and destination addresses for all IP services that are allowed from the PCI zone. The list of allowed services is grouped by each PCI zone source address. Note that the entering interfaces are in the PCI Zone.
